## DETAILED ACTION

### ***Continued Examination Under 37CFR 1.114 After Final Rejection.***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/30/2008 has been entered.

### ***Allowable Subject Matter***

2. **Claims 1-19** are allowed.
3. The following is an examiner's statement of reasons for allowance:

**Claims 1-19** are allowable because the closest prior art, Nakayama et al. [WO 2003/087856], fail to anticipate or render obvious a network analyzer (or a method or a program of instructions to perform a processing or a computer readable medium), comprising:

a correction coefficient outputter that outputs measured first coefficients and second coefficients of a correction frequency converting element, wherein a signal output from a first terminal of the device under test is represented as a sum of a product of a signal input to the first terminal and a first coefficient and a product of a signal input to a second terminal of the device under test and a second coefficient, a ratio of the magnitudes of the second coefficients is constant, and a frequency of the signal input to the first terminal is different from

a frequency of the signal input to the second terminal; in combination with all other limitations in the claim(s) as claimed and defined by applicant.

***Conclusion***
